

Quality Labelling Systems

- Rotary Labellers, mechanical or electronic cam
- Inline, benchtop and special purpose models
- Automatic web splice and waste removal system
- Inspection and ejection systems
- Promotional necktag applicators
- Self adhesive label and neck tag supply
- Cost effective tooling options
- Quick and repeatable changeovers
- Long service life
- Low ongoing cost of ownership
- Australian Designed, Manufactured and Supported since 1973

LEADING BY DESIGN

Promotional /
Printer Applicator

APPLICATIONS

- Promotional labelling
- Carton print and apply
- Shrinkpack labelling

OPTIONS

- Print engine for print and apply
- Airbox for non contact labelling (no synchronization required)
- Synchronization to conveyor speed
- Universal stand for side and top label
- Entry level or high speed versions

Inline
Standard Series

APPLICATIONS

- Slow to medium speed versatility with faster changeover
- 2001 VAC for cylindrical or conical products with straighten attachment
- 3001 TC for flat sided or elliptical products with option for rounds
- 3001 VAC for front / back off separate webs, eg wine industry

OPTIONS

- Printer integration
- Orientation attachment
- Additional heads and wipedown attachments
- Conveyor / line integration

Inline High
Performance Series

FEATURES

- High speed / high accuracy
- Versatile with fast changeover
- Motorised waste rewind for full reel removal at high speed
- PLC / touchscreen control
- Heavy duty build quality
- Industrial grade components for long service life

APPLICATIONS

- 2000 VAC for cylindrical or conical products in multiple industries
- 3000 FFVAC for flat and elliptical applications with option for rounds
- 3000 SBVAC for milk industry with options for flats and rounds
- 3000 VAC for wine industry with option for neck station

OPTIONS

- Printer integration
- Orientation attachment
- Verification and ejection systems
- Category 2-4 guarding

Rotary

A wide range of rotary label applicators are available to suit any industry

FEATURES & OPTIONS

- Superior product handling for high speed and difficult applications
- Electronic and mechanical cam machines
- Product orientation, mechanical, optical or vision
- Webmaster auto splice and waste removal
- Automatic interchange between labelling stations
- Verification and ejection systems
- Innovative tooling options for fast changeover
- PLC / touchscreen control

Semi-Automatic

FEATURES & OPTIONS

- For labelling square or 'difficult' shaped products
- Basic portable bench-top applicator
- Stepping-motor label web drive
- Programmable controller housed in machine-frame chassis
- Adaptable accessories include air vacuum adaptors, label roll-on attachments and waste-rewind units
- Simple set-up and fast change-over
- Heavy duty design
- Optional clear-label scanner
- Optional range of printers can be added

Auto Splice & Waste Removal

The Webmaster is a clever device which automatically joins label reels and removes waste without halting the line

FEATURES & OPTIONS

- Can be integrated into Rotary or inline machines
- Continue production without stopping
- Less operator supervision required
- Only setup 1 head as opposed to 2 station interchange for each label
- Free up space for shorter / smaller machine

Special Purpose

FEATURES

- High speed / high accuracy
- Versatile with fast changover
- Motorised waste rewind for full reel removal at high speed
- PLC / touchscreen control
- Heavy duty build quality
- Industrial grade components for long service life

APPLICATIONS

- C-wrap labellers
- Tamper evident labellers
- Syringe labellers
- Tube labellers
- Unerected cartons
- Promotional neck tag applicator
- Custom build projects

Hidec Labelling & Repackaging Service

Impresstik's contract labelling division (named Hi-Dec), has assisted many of Australia's manufacturers and importers by offering a fast and cost effective labelling service for all kinds of bottles, tubs, cartons, cartridges and tubes.

Whether for particularly difficult applications or for standard labelling requirements, Impresstik Hi-Dec provides the answer.

From special promotional applications, to new product launches, the Hi-Dec contract labelling division can provide the ideal self-adhesive label solution - either on a long-term basis or until investment in labelling equipment becomes a viable proposition for the client.

Impresstik Hi-Dec also prides itself on being able to offer a complete service, from label sizing and printing (where required) through to final application and packaging.

LEADING BY DESIGN

Impresstik Labelling systems has a proud history of being at the forefront of labelling technology since it was established in 1973.

Our World class product offering has been, and continues to be developed and produced in Australia.

Impresstik has set itself the highest standards in every respect - and continually seeks further improvement in an ever-changing environment & marketplace. The company also constantly strives to maintain equally high levels of expertise, customer service and innovation.

Sister company Impresstik Labels is located near Impresstik labelling systems and offers a wide range of Label printing services and neck tag supply.
